

**Table 2: Study 2 Correlations***Correlations between voice variables and psychology self-report measures*

	VHI	Voice Symptoms	Avoidant Attachment	Anxious Attachment	Anxiety	Shame	Minimization	Ch. Trauma
VHI	-	.60***	.33*	.32*	.26	.12	.25	.44**
VRQOL <sup>1</sup>	.82***	.46**	.49***	.50***	.44**	.11	.01	.55***

\* =  $p < .05$ , \*\* =  $p < .01$ , \*\*\* =  $p < .001$ 

1. Higher V-RQOL scores indicate less voice-related quality of life.
